Joseph K. Scott
Associate Professor, Georgia Institute of Technology
Ford ES&T, Room 2220
Atlanta, GA, 30332
joseph.scott@chbe.gatech.edu

EDUCATION

Ph.D., Chemical Engineering, April 2012

Massachusetts Institute of Technology, Cambridge, MA

Advisor: Professor Paul I. Barton

M.S., Chemical Engineering Practice, January 2008

Massachusetts Institute of Technology, Cambridge, MA

B.S., Chemical Engineering, May 2006

Wayne State University, Detroit, MI

ACADEMIC POSITIONS

Associate Professor, August 2019-Present

Department of Chemical and Biomolecular Engineering, Georgia Tech, Atlanta, GA

Assistant Professor, August 2013-2019

Department of Chemical and Biomolecular Engineering, Clemson University, Clemson, SC

Visiting Researcher, June 2013-August 2013

Department of Industrial and Information Engineering, University of Pavia, Pavia, Italy

Postdoctoral Research Associate, May 2012-August 2013

Department of Chemical Engineering, Massachusetts Institute of Technology, Cambridge, MA

Supervisor: Professor Richard D. Braatz

INDUSTRIAL POSITIONS

Intern, November 2007-December 2007

GlaxoSmithKline, Research Triangle Park, NC

Intern, September 2007-October 2007

BASF, Ludwigshafen, Germany

Quality Control Lab Technician, June 2004-June 2006

Quaker Specialty Chemicals, Detroit, MI

HONORS AND AWARDS

Invited Speaker, Foundations of Computer-Aided Process Design (FOCAPD), 2019

Plenary Speaker, American Institute of Chemical Engineers (AIChE), Computing and Systems Technology Division, 2018

Automatica Paper Prize 2014-2016, International Federation of Automatic Control, 2017

Air Force Young Investigator Program Award, 2016

W. David Smith, Jr. Graduate Student Paper Award, AIChE, 2016

Computers and Chemical Engineering Most Cited Articles of 2010-2012 List, 2013

Best Session Paper, *Fault Detection/Accommodation II*, American Control Conference, 2013

Inaugural Best Paper Award, Journal of Global Optimization, 2012

Outstanding Seminar Award, MIT, Department of Chemical Engineering, 2009

Robert G. Wingerter Award for Excellence in Scholarship, Character, and Leadership, Wayne State University, College of Engineering, 2006

High Scholastic Average Award for Outstanding Academic Excellence, Wayne State University, College of Engineering, 2006

Presidential Scholarship, Wayne State University, 2002

INVITED LECTURES

1. Hakizimana, A. and Scott, J.K., "A Novel Optimization Approach for the Integrated Design and Operation of Flexible Manufacturing Systems," Foundations of Computer-Aided Process Design (FOCAPD), Copper Mountain, CO (July 2019)

2. Scott, J.K., "Rapid and Accurate Reachability Analysis for Nonlinear Systems by Exploiting Model Redundancy," Kolchin Seminar in Differential Algebra, New York University (March 2019)

3. Scott, J.K., "Rapid and Accurate Uncertainty Propagation, Safety Verification, and Fault Detection in Chemical, Aerospace, and Robotic Systems," Department of Chemical and Biological Engineering, University of Wisconsin-Madison (February 2019)

4. Scott, J.K., "Algorithms for Guaranteed Safety Verification and Fault Detection in Chemical, Aerospace, and Robotic Systems," Department of Chemical and Biomolecular Engineering, Georgia Institute of Technology (January 2019)

5. Shen, K., Yang, X., and Scott, J.K., "Verifying Performance Specifications for Dynamic Processes Under Uncertainty Using Backward Reachability Analysis," CAST division plenary, Annual Meeting of the American Institute of Chemical Engineers (AIChE), Pittsburg, PA (October 2018)

6. Scott, J.K., "Dealing with Uncertainty in the Simulation and Optimization of Complex Chemical and Energy Systems," School of Chemical and Biomolecular Engineering, Georgia Institute of Technology (March 2018)

7. Scott, J.K., "Efficient Solution of Mixed-Integer Multistage Stochastic Programs for the Integrated Design and Operation of Smart Manufacturing Systems using Differentiable-in-Expectation Decision Rules," Department of Industrial Engineering, Clemson university (February 2018)

8. Scott, J.K., "Efficient Solution of Mixed-Integer Multistage Stochastic Programs for the Optimal Design of Smart Manufacturing Systems using Smooth-in-Expectation Decision Rules," Department of Mathematical Sciences, Clemson university (November 2017)

9. Scott, J.K., "Advanced Relaxation Techniques for Guaranteed Global Optimization of Complex Simulations," Sandia National Laboratory (February 2017)

10. Scott, J.K., "Optimal Design and Operation of Intermittent Renewable Energy Systems," School of Chemical and Biomolecular Engineering, Cornell University (February 2015)

11. Scott, J.K., "Advanced Simulation and Optimization Techniques for Process and Energy Systems Engineering," American Institute of Chemical Engineers, Western South Carolina Local Section (February 2015)

12. Scott, J.K., "Optimal Design and Control of Renewable Energy Systems with Storage and Intermittent Generators," Department of Chemical and Biological Engineering, Princeton University (December 2014)

13. Scott, J.K., "A New Relaxation Technique for Nonconvex Stochastic Programs with Continuous Random Variables," Annual Meeting of The Institute for Operations Research and the Management Sciences (INFORMS), San Francisco, CA (November 2014)

14. Scott, J.K., "Computational Analysis of Dynamic Chemical Systems," Department of Chemical Engineering, McMaster University (March 2014)

15. Scott, J.K., "Reachability Analysis and Global Optimization of Differential-Algebraic Systems," Department of Mathematical Sciences, Clemson University (October 2013)

16. Scott, J.K., "Design of Active Inputs for Set-Based Fault Diagnosis," Department of Industrial and Information Engineering, University of Pavia (July 2013)

17. Scott, J.K., "Global Optimization of Dynamic Systems," Automatic Control Laboratory, Institute of Mechanical Engineering, Ecole Polytechnique Federale de Lausanne (EPFL), (July 2013)

18. Scott, J.K., Schaber, S.D., Wechsung, A., and Barton, P.I., "Relaxing Dynamic Optimization Problems: Convergence, Clustering, and the Effect of Time," The Fourth International Conference on Continuous Optimization, Lisbon, Portugal (July 2013)

19. Scott, J.K., "Reachability Analysis and Global Optimization of Differential-Algebraic Systems," Center for Advanced Process Decision-Making Seminar Series, Carnegie-Mellon University (May 2012)

20. Scott, J.K. and Barton, P.I., "Generalized McCormick Relaxations," Annual Meeting of The Institute for Operations Research and the Management Sciences (INFORMS), Charlotte, NC (November 2011)

21. Scott, J.K., Kim, K.K., Kishida, M., Braatz, R.D., and Barton, P.I., "Construction of Design Spaces for Batch and Continuous Processes," Workshop on Quality by Design, University of Massachusetts, Amherst (June 2011)

22. Scott, J.K. and Barton, P.I., "Interval Bounds on the Solutions of Semi-Explicit Index-One DAEs," The International Conference on Applied Mathematics, Modeling and Computational Science, Waterloo, Ontario (July 2011)

RESEARCH ACTIVITIES

Active Funding

Fault Detection and Diagnosis for Uncertain Nonlinear Systems Using Set-Based State Estimation, National Science Foundation, Principal Investigator, $287,827 ($287,827), (January 1, 2019 – December 31, 2021)

Efficient Global Dynamic Optimization using Dynamic Cut Generation and Domain Reduction Techniques, National Science Foundation, Principal Investigator, $290,476 ($290,476), (August 15, 2018 – July 31, 2021)

RAPID Center for Process Modeling, US Department of Energy, co-Principal Investigator $300,000 ($300,000), (January 1, 2019 – December 30, 2021)

Completed Funding

RAPID Center for Process Modeling, SC Department of Commerce, Principal Investigator $200,000 ($200,000), (February 19, 2018 – July 31, 2019)

Strategies for Continuous Biologics Purification with New Affinity Membranes, National Institute of Health, co-Principal Investigator, $422,343, ($177,214), (September 20, 2018 – July 31, 2019)

H-Canyon Process Model Development, Savannah River Nuclear Solutions, Principal Investigator, $100,000 ($16,128), (January 9, 2019 – July 31, 2019)

Decomposition Strategies for Process Flowsheet Optimization Problems in Fossil Energy, Technology and Engineering Solutions of Sandia, Principal Investigator, $78,030 ($78,030), (December 21, 2018 – July 31, 2019)

Add on to - Global Optimization of Large-Scale AC Power Flow Problems, Technology and Engineering Solutions of Sandia, Principal Investigator, $70,817 ($70,817), (October 1, 2018 – July 31, 2019)

Lignin Fractionation and Valorization: Focusing on Both Value and Quality, US Department of Energy, Co-Principal Investigator, $1,795,239, ($147,431), (March 1, 2019 – July 31, 2019)

Air Force Young Investigator Program: Rapid and Accurate Uncertainty Propagation for Nonlinear Dynamic Systems by Exploiting Model Redundancy, Air Force Office of Scientific Research, Principal Investigator, $328,672 ($328,672), (May 1, 2016 – April 30, 2019)

Add on to - Global Optimization of Large-Scale AC Power Flow Problems, Technology and Engineering Solutions of Sandia, Principal Investigator, $40,053 ($40,053), (February 1, 2018 – September 30, 2018)

Decomposition Strategies for the Solution and Optimization of Process Flowsheets in Energy Production and Power Grid Operations, Technology and Engineering Solutions of Sandia, Principal Investigator, $33,287 ($33,287), (May 15, 2017 – August 15, 2018)

Global Optimization of Large-Scale AC Power Flow Problems, Technology and Engineering Solutions of Sandia, Principal Investigator, $57,270 ($57,270), (July 20, 2017 – September 30, 2017)

Graduate Advising

Pengfei Cheng (PhD) – *TBD*
Expected graduation: May 2024

Bowen Mu (PhD) – *TBD*
Expected graduation: December 2024

Jason Ye (PhD) – *TBD*
Expected graduation: May 2024

Dylan Weber (PhD) – *Advances in Modeling, Numerical Simulation, and Optimization of Membrane Processes for Process Intensification*
Expected graduation: May 2023

Dillard Robertson (PhD) – *Rigorous Decomposition Approaches for Guaranteed Global Optimization*

Expected graduation: May 2023

Taehun Kim (PhD) – *Process Intensification by Adsorptive Cyclic Separation Processes: Computational Modeling, Simulation, and Optimization*
Expected graduation: May 2022

Yuanxun Shao (PhD) – *Advanced Convex Relaxations for AC Optimal Power Flow and Nonconvex Stochastic Programs*
Expected graduation: May 2021

Xuejiao Yang (PhD) – *Fault Detection and Diagnosis for Nonlinear Systems Under Uncertainty*
Expected graduation: May 2020

Kai Shen (PhD) – *Advances in Reachability Analysis for Nonlinear Dynamic Systems*
Graduated: March 2019

Alphonse Hakazimana (PhD) – *Integrated Design and Operation of Intermittent Renewable Energy Systems*
Expected graduation: November 2019

Undergraduate Advising

Jack Tabb (BS) – *Dynamic Simulation of Pressure Swing Adsorption Processes*
Expected Graduation: May 2020

Adam Beitz (BS) – *Machine Learning Algorithms for Biosensor Development*
Graduated: May 2019

Dillard Robertson (BS) – *Effective Design of Matlab Libraries for Fast Uncertainty Propagation via Computational Graphs*
Graduated: May 2018

Cody Allen (BS) – *The Effects of Stochastic Simulation Methods on the Optimal Design of Renewable Energy System*
Expected Graduation: May 2019

Robert Powers (BS) – *Dynamic Modeling and Optimization of a PEM Electrolyzer in a Renewable Energy System*
Graduated: May 2015

Coleman DeVore (BS) – *Dynamic Proton Exchange Membrane Fuel Cell Modeling*
Graduated: May 2015

TEACHING ACTIVITIES

Courses Taught

ChBE 2130 –Thermodynamics (UG)

Department of Chemical and Biomolecular Engineering, Georgia Tech, Fall 2019

CHE 8040 – Advanced Thermodynamics 1 (G)

Department of Chemical and Biomolecular Engineering, Clemson University, Fall 2017-18

CHE 2200 – Thermodynamics 1 (U)

Department of Chemical and Biomolecular Engineering, Clemson University, Spring 2014-18

CHE 8140 – Applied Numerical Methods in Process Simulation (G)

Department of Chemical and Biomolecular Engineering, Clemson University, Fall 2014, 16, Spring 2018

CHE 4070/4071 – Unit Operations Lab II (U)

Department of Chemical and Biomolecular Engineering, Clemson University, Fall 2013, 2015

CHE 4910 – Special Projects (UG)

Department of Chemical and Biomolecular Engineering, Clemson University, Fall 2016-18, Spring 2017-19

CHE 8950 – Graduate Seminar (G)

Department of Chemical and Biomolecular Engineering, Clemson University, Fall 2016, Spring 2017

10.34 - Numerical Methods Applied to Chemical Engineering (G)

Department of Chemical Engineering, Massachusetts Institute of Technology, Fall 2011

AFFILIATIONS AND SERVICE

Member, American Institute of Chemical Engineers, 2005-Present

Member, IEEE, 2013-2015, 2018-Present

Member, Institute for Operations Research and the Management Sciences, 2014-2016

Editor, *Optimal Control Applications and Methods*, 2019-Present

Editor, *Processes*, 2018-Present

Review Editor, Frontiers in Energy Research: Process and Energy Systems Engineering, 2015-Present

Technical Associate Editor, IFAC World Congress, 2020

Editor, IEEE Conference on Control Technology and Applications, 2020

Associate Editor, American Control Conference, 2018-2019

Program Coordinator, AIChE National Conference, Computing and Systems Technology Division, Area 10d, 2020

International Programming Committee, Foundations of Computer-Aided Design, 2019

Session Chair, AIChE National Conference, 2014-2019

Session Chair, AIChE Spring Conference, 2019

Session Chair, IEEE Conference on Decision and Control, 2018

Session Chair, American Control Conference, 2018

Session Chair, Foundations on Computer-Aided Process Operations, 2017

Active reviewer for Automatica, IEEE Transactions on Automatic Control, the Journal of Optimization Theory and Applications, the Journal of Global Optimization, Computers and Chemical Engineering, Journal of the AIChE, SIAM Journal on Numerical Analysis, IEEE Control Systems Magazine, Industrial and Engineering Chemistry Research, Optimal Control Applications and Methods, DAE Forum, the IEEE Conference on Decision and Control, the American Control Conference, the European Control Conference, the IFAC Symposium on Nonlinear Control Systems, etc.

PUBLICATION RECORD

Journal Articles

1. Shen, K. and Scott, J.K.*, "Tight Reachability Bounds for Constrained Nonlinear Systems using Mean Value Differential Inequalities," *Automatica*, Submitted (2019)

2. Rego, B.S., Raffo, G.V., Scott, J.K., and Raimondo, D.M.*, "Guaranteed Methods Based on Constrained Zonotopes for Set-Valued State Estimation of Nonlinear Discrete-Time Systems," *Automatica*, **111** (2020) 108614

3. Liu, J., Laird, C.D., Scott, J.K., Watson, J.-P, and Castillo, A.*, "Global Solution Strategies for the Network-Constrained Unit Commitment Problem with AC Transmission Constraints," *IEEE Transactions on Power Systems*, **34**(2), 1139-1150 (2019)

4. Yang, X. and Scott, J.K., "Accurate Uncertainty Propagation for Discrete-Time Nonlinear Systems Using Differential Inequalities with Model Redundancy," *IEEE Transactions on Automatic Control*, Submitted (2018)

5. Shen, K. and Scott, J.K., "Exploiting Nonlinear Invariants and Path Constraints to Achieve Tighter Bounds on the Flows of Uncertain Nonlinear Systems using Differential Inequalities," *Mathematics of Control, Signals, and Systems*, Submitted (2018)

6. Schaber, S.D., Scott, J.K., and Barton, P.I., "Convergence-order Analysis for Differential-Inequalities-Based Bounds and Relaxations of the Solutions of ODEs," *Journal of Global Optimization*, **73**(1), 113-151 (2019)

7. Yang, X. and Scott, J.K., "A Comparison of Zonotope Order Reduction Techniques," *Automatica*, **95,** 378-384 (2018)
